GOIN' HOME TO-DAY.

I've walched the lawyers right and left, and given I stuck so long unto my chair, I thought I would And if I do not know myself, they'll get me there Bul now the court's adjourned, for good, and I've I'm loose at last, and, thank the Lord, I'm going home to-day.

I've somehow felt nneasy like, since the first day I came down; It is an awkward game to play the gentleman in And this ere Sunday sull of mine on Sunday rightly Bul when I wear the stuff a week, it somehow galls and frets. I'd rather wear my homespun rig of pepper salt and I'll have it off in half a jiff when I gel home lo-day. I have no doubl-my wife looked out, as well as any As well as any woman could—to see that things were

done;
Fer though Melinda, when I'm there, won't sel her fool ouldeers, She's very careful, when I'm gone, to tend to all the But nothing prospers half so well when I go off to And I will put things into shape, when I get home

The mornin' that I came away, we had a little land; I coolly took my hal and coal, before the show was For what I said was nought whereat she ought to And she was always quick at words and ready to But then she's first one to give up when she has had her say;

And she will used me with a kiss when lee house. her say; And she will meel me with a kiss when I go home

My little boy-I'll give 'em leave lo match him, if they can; It's fuo to see him strut about, and try to be a man; The gamest, cheerlest, little chap you'll over want. And then they laugh, because I think the child re-The little regnet he goes for me, like robbers for He'll lurn my pockets inside out, when I get home

My little girl-I can't contrive bow it should happen That God should pick that sweet bouquet and fling My wile, she says that landsome face will some day toake a sir;
And then 1 laugh, because she thinks the child resembles her. She'll meet me half way down the hill, and kiss me And light my heart up with her amiles, when I go hame to-day.

If there's a heaven upon the earth, a fellow knows it But let my creed be wright or wrong, or be trasit gend of the 'White Cat,' who, after My heaven's just shead of me -1'm going home to-- Will Carleton, in "Farm Ballads."

THE CONDUCTOR'S STORY. AN EPISODE OF BIDWELL'S BAR.

[Argonaut.] I think it is Emerson who says: "When you pay your ticket and get into the ear you have no gness what good company you shall find there. You buy much that is not rendered in the bill.' I have found this remark eminently true

thing clse, with whole-souled earnestness, and finds bread where most people
could gather only stones. Thus recent could gather only stones. Thus, recently, being in the rear car of the long train, she preferred standing upon the platform and drinking in at one draught that magnificent valley through which | cubic feet that had been moved and re- | zig-zag to and fro, as though he was on we seemed flying than by tantalizing sips, as one has to do from behind a narrow car window.

I followed her. I always do. And, holding on to the narrow railing, we felt somewhat like two lost comets whirling through space. Soon the door behind us banged, and a gentleman in the midsummer of life, with a face as classically beautiful as Edwin Booth's and a waist of Falstaffian dimensions, joined ns. He beamed on us almost literally. From the dimple in his fair, soft chin to the ring of brown, silky hair which lay upon his broad, smooth forehead, the expression scintillated with intelligent good nature. Withal, there was sneh a retrospective background to the sunny sers and cooking flapjacks is not the brightness that after a few commonplaces Ruth, the daring, honest, impudent erenture, said, looking up meanwhile into his face with a smile so honest | and deeds of knightly valor were purely and kindly that he would have been a and intensely Byronic, such a fate you just as I originally intended." Nor did Berserker not to have rellected it:

"Sir, permit me to remark that you are a physical incongruity." "Not so bad as that, madame, I hope. I am merely a conductor, as by this time you have discovered, and a pretty well balanced one, independent of

avoirdupois.' is what perplexes me. It should belong to a body but one-third the weight of yonrs," suggested Ruth, the wise disciple of Lavater.

stroking his cheeks and chin with an air that contentment and my good linck show themselves. Once I was as thin as pansed, looking into Ruth's clear, gray cyes as if he would sound her soul's depths—"I am strongly tempted to tell you my bit of a romance, for there is a long stretch ahead, and you look like one of the kind to enjoy a touch of nature.

.The conductor had struck the very keynote of our needs. We were pining for a veritable California story, told in an un-conventional way, ontside of the well-read romances of Bret Harte and The Argonaut. To be told, too, under such uliar circumstances would be an added spice, and thus besonght him to immediatly yield to temptation.

"I am an old stager," he said, "at least as far back as the spring of 1850. With a blanket strapped upon my back, fifty cents in my pants' pocket and the biggest stock of hope and unused energy that ever made a lad's heart as light as a balloon, I tramped along here in my search for the 'gold diggings.' My ambition was higher than those buttes yonder by thousands of feet, and the top was to be capped by solid gold," pointing as he spoke to the three singular and isolated peaks we were just then passing, known as the Marysville Buttes, whose volcanic heights looked as inaccessible to ns as their peaks seemed brown and bar-

"It appears to me," said Ruth, measuring the most precipitous sides of those lofty and mysterious hills, "that when a man aspires to touch the sky he would want a higher guerdon than mere gold, not, however, that I hold the metal in

"I had, madame, and that was the whole matter. I was desperately in love—that was a solemn fact, expressed lieve that she loved me, but the top of Mt. Shasta was not more nnattainable

VOL. XVI. NO. 42,

My business on the jury's done-the quibblin' is all

to move; so Jennie and I said good-ba one afternoon nuder an old oak in Far. mount l'ark, and in the very depths of my heart I believed that she would bo true to me. It was not a severe seven days' ride in a palace or from New York to San Francisco in twenty-nine years ago, seeking his brwas a weary and homesick one as wdl."

nsed, do you mean this veritable Valey of the Sacramento? said Ruth.

"The very same. My objective polet was a place now famous in the animats of that period, called 'Bidwell's Bar,' on account of a right bar in the Einther account of a rich bar in the Feather River, full of golden sand, which was discovered by General Bidwell. The place was many miles from me; the country was thinly settled; I did not thow a soul (for even tramps were scarce in those early days), and so my courage and my legs gave out together. Pulling off my boots about 5 o'clock one sultry day, I bared my blistered feet to the usleep, hoping that I would never awake again this side of the stars. I did, however, conscious that my toes were being

that it was being done by a brown setter dog, about as hungry-looking and generally dilapidated as I was myself. Where he came from I never knew, but, looking into his half-human eyes, we speedify entered into a sort of dumb that the poor fellow (I never could call him a brute) had a sore knee, intlamed and bleeding. I tore a strip off from my last handkerchief to bind it up, and, it place of the Good Samaritan's oil and wine, gave him my last serap of coll bacon. It is strange, but forlorn as I If I had been raised a Brahmin I would boyish faucy, as heart began to lose its boyish faucy, as heart began to lose its posed to that of the disciples of Desventh?" said Buth, with the least hit of when He's been away from home a week, and then gets have believed that some immortal spirit of unfailing cheerfulness and unending the bound, the bound is believed that some immortal spirit of unfailing cheerfulness and unending resources was imprisoned in that dogs to that of the disciples of Descent to the bound, which the least bit of cartes, who ascribed the variation to the contract the believed that some immortal spirit of unfailing cheerfulness and unending resources was imprisoned in that dogs the bound, the bound is the bound of the disciples of Descent to the bound, and the post of the disciples of Descent to the disci body. Did you ever read the fairy be ductor quietly. "I had become almost

licked in a gentle fashion, and discovered

suddenly stood before him a woman, sing shot as a unisance I went to no place fair as Aurora. Fritz, for that was the where it was impossible for him to acname by which I called the dog, looked nt me with Jennie's brown eye, even to New York, and on the journey I half roguish, half thoughtful, and tel gether we resumed our journey. No born in a wilderness of wibl mustard, would I have followed in the wake of the and as fend of camp-life as an Indian young Prince, even had I known the re would take to the constraint of an old sult would have been similar, for Fritathe dog, was invaluable just as he was All lonesomeness was gone now that he would take to the constraint of an old eity. Well, I had not been in New York a week before there was a strong tugging at my heart to run down to Philadelphia rarely left my side, and, although or shadows had grown best by the time w on several occasions, particularly when my life-long friend Ruth bears me company.

Shadows had grown bess by the time w parents had died before I first left it. I reached the 'bar,' our immaterial entities were in prime order for everything in the desire 'the charm of association,' and it led me. Ruth is the most unconventional of shape of adventure. 'Have never seen of the conventional of shape of adventure. 'Have never seen of the conventional of shape of adventure.' women. She travels as she does every | any gold dug.' Then I'll not at this late

had, in advance, labeled 'Bonanza.' "I might have succeeded, but I was prostrated by a malarial fever, and for days and weeks lay unconscious at the "But your thoughtful face, sir, that tender mercies of a few rough Welsh what perplexes me. It should belong miners with human hearts. My little hoard of money and my energy melted away together like spring snow. But for Fritz I'd have died of disappointment "My face is all right," he replied, alone. He had adopted the Never say die' motto, and as I often read in his of marvelous self-complacency. "It stopped growing ten years ago, but it is coward! At him again!" as a tender and appreciative sympathy which the gift of phragm with the tip of his forefinger, speech could not have more assur-My unress had pitched me a tent after. on the south side of a low hill, and had Peter Schemmel's shadow, and"—he left me to get well at my own leisure.

pansed, looking into Ruth's clear, gray My 'bottom dollar' had dwindled to the value of a dime, my loga to thickness of a pair of tongs (for all appetite was State. We have a boy ten years old, me. By the flickering light of a bit of tallow candle I began the letter, the first I had written for months. I thought aloud and wrote. Fritz lay beside me, his nose wedged between his paws, but I knew by the twitch of his ears that he understood every word I was wit-

I had reached the climax of renunciation and wretchedness-or, rather my expression of it—when he suddenly rose and went out. I soon heard him pawing and scratching and tearing the to China before daylight. Thinking he had found the burrow of a wolf or for I called him off; but he was as deaf as a rock to my voice. Seizing the candle I hurried to the spot, around which lay a of our the night. half bushel of gravel which he had loscued, when my eye caught the gleam of a dull, red streak that veined a piece of quartz about the size of an egg lyng among the fresh earth. Would you believe it? That streak was worth \$50, for it was virgin gold. Nor was it the oly one upon that hillside. Fritz had found a lode (thunks to the gopher), and I thereby had found a fortune. As con as possible I had the gold of that precious stone wrought into a ing of my own designing—all of it, at lest, but the contents of one blant coner, which, in its native roughness, I lad mounted as a brooch. Schding these to

Philadelphia druggist, had money, and piece of rare good fortune as a memorial had none. He was as proud as Luci and stone."

fer, and as ambitious for his daughter a he was proud. I felt that I could 'more as a memorial that I sent my first bit of a mountain, if I could find a mountain treasure, but I expected to get it back again within two years, and the girl with moon. "And did you?"

"No; nor even received a line of ac-knowledgement that my offer had been accepted. Nothing finds gold quicker than gold, when a man has once got a portant bearing upon the colonization of those days, and the tall, slender, hungy, fair share of it, and in two years I had, niless had who tramped along here in various ways, secured \$20,000. Intwenty-nine years ago, seeking his br-tme like another Dick Whittington, to Philadelphia in all the pride of a con-valuable, as an article of dict, as fresh "By 'here,' which you have twee here; to wind up with the chime of wed-

> she ever remembered me. "You certainly did not let that fact dampen the ardor of your pursuit?" queried Ruth; "you followed her, of

"I did no such thing, madam. I returned to San Francisco, and plunged into the excitement of gold hunting with a recklessnesss that a woman can not understand. Six months after and I lost every dollar, but by that time I had learned that experience is worth nothing as solid capital until it has been dearly bought. I whistled my rhyme:

"Loss and gain, pleasure and pain, Balance the sec-saw of life, in the sensitive ears of my faithful Fritz, hugged his brown head close to my shoulder—don't laugh, that dog was my friend-rolled up my sleeves, and again went to work with a vigor that I knew meant certain success if the vein held we speedity entered into a sort of damb compact to tradge on together. I found had a bank account which ran largely into the thousands. I invested it in land. By that time I was a bachelor of thirty. Hard knocks and my one big was in those days; I recall them with a with the construction of this railroad." "And you have quite outlived your

I wish you could stop human of him. I wish you could stop off a bit and see my wife. Queer, isu't it that I should have introduced this bit of private history upon you? But the truth is -. Yes-coming! I'll be with you again; ladies."

A brakeman beckoned him inside, and we had seen the last of our handsome

The evening shadows had begun to The setting snn had turned the vast plain of the Sacramento Valley into a "field of the cloth of gold," and the distant peaks of the Sierras, clad in eternal but now rose-tinted and glowing. seemed to cleave the azure above them as with a wedge of burnished silver. It was starlight when we reached the end of our car-ride and were registered for

"The conductor's story was a pleasant little episode, Rnth, wasn't it? Do von believe it all happened?" I asked, as I leaned from my pillow to her's to leave a good-night kiss on her round cheek. 'I like Fritz," was the sleepy answer. "There's an instinct about some dogs that the half of mankind can neither appreciate nor maintain. I trust a man whom a good dog loves."

"Is THERE a letter here in a seented envelope for my wife?" he asked the Postmaster, while the green fires from Jennie, I—"

"An act of great generosity, si I think," interrupted Ruth with a language glint in her eye. "One would have thought you'd have preserved and her content of the first think," interrupted Ruth with a language glint in her eye. "One would have thought you'd have preserved and her content of the first from his eyes made the office look like a leafy master, and he handed it out. The jealous man tore it open at once, when, lo and behold I it was the milliner's bill to me than Jennie. Her father, an old thought you'd have preserved sud a for \$50. No succeeding chapters.

SCRAPS OF SCIENCE.

HERR TROMHOLT thinks he can trace a onnection between the frequency of displays of aurora and the phases of the

Dn. Ricoux maintains that while Spaniards, Italians and French can be celimatized in Algeria, people from the North of Europe eannot. This result, if well established, may have a very im-Africa in the near future. Mn. WIGNER, in the Analyst states

vuluable, as an article of dict, as fresh boneless beef, and that the cooked oxtongues contain less salt and more nutritive matter than the dried tongnes usualy sold in European markets. M. GRENAUT proved in recent experinents that the quantity of carbonic acid exhaled by any one individual of an mimal species varies but little. 1rritations and intlammations of the respiratory

nucous membrane decrease the exhalu-

tion of earbonie acid, which then tends o accumulate in the blood. Mn. W. H. Preece, the English electrician, has determined with much acuracy the area protected by a properly djusted lightning-rod. His couchsien s that the protection extends to a conid pace whose height is the length of the rod, the base being a circle having its radius equal to the height of the rodan opinion which has been held by scien-

titic men for a long time. Considerable changes in the waterlevel of several lakes in California and Oregon are reported. It is stated that Goose Lake, thirty miles loug, was nearly dry in 1853 and 1854, but conlained ten feet of water in 1870, and its depth has since been increasing. Clear Lake is also ten feet deeper than in 1874, while Tulie Lake, in the same region, is now ten or fifteen feet higher than then.

Though the invention of the barometer

due to the mathematician Torricelli, yet in England Sir Christopher Wren was the first to suggest that the varying weight of the atmosphere was the true cause of the variation in the height of the mercury. This was a theory oppart of the world a greater or less quantity of fine yellow powder, which

fall is popularly believed to be a shower of sulphur. Investigation, however, shows the powder to be the tine pollen of a species of pine tree. The pollen grains that easily in the air, and are often carried by gales a thousand miles. When they fall on snow the effect is often startling.

For preserving the natural colors of dried flowers and plants, this process has been recommended by German cientists: Dissolve one part of salicylie cid in 600 parts of alcohol, heat the olution to boiling in a shallow dish, and lraw the plant through it slowly; shake' ff any excess of liquid, dry between blotting paper, and press in the usual manner. Natural colors are said to be hus preserved in greater perfection than ov other processes.

It is believed that porosity is a proprty of all bodies. An experiment perornied some years ago, to ascertain' whether water could be compressed, resulted in proving that gold is poronshe water inclosed in a hollow sphere of old and forced by the violent pressure pplied passed through the sphere and apeared on the ontside. The poresthrough which the liquid was driven could not rave been more than the two-millionth of an inch in diameter.

A CERTAIN Count Hugo von Engenerg, of Fratzberg in the Tyrol, ismaking ase of microphones—sunk in the ground on a declivity of a hill, and connected eparately with a single telephone and nall battery-to discover a source of vatar for his castle. He intends to conluct the experiment by night, when dissurbing sounds and vibrations of the ground are less frequent than by day, If a stream of water flows near the up-paratus it will pass the sound to the elephone, and thus reveal the spring.

One day about a year ago, a medium sized gentleman, with a sharp, intelligent eye, was slanding about 8 o'clock in the evening, on the side of the Bowery. A policeman came along. The gentleman asked the otlicer what the crowd was doing there, and the latter replied "I don't know. It's none of your

business, anyhow. Move on." "I asked you a civil question," said the other, quietly. "I don't give a ---," retorted the officer. "You move on.

"I won't," persisted the man lirmly "Well, I'll take you in," announced the eop, and he did. About a block from the station house the two met the sergeant, who saluted the arrested man politely, while the cop looked on in astonishment. The sergeant asked what the trouble was. "He was disorderly and I arrested him," returned the officer averting his face as he spoke "You infernal fool!" exclaimed the sergeant, "don't you know who that

"No," said the officer, faintly. "It's Commissioner Sid Niehols." The eap fainted dead away. The oke was so rich that, after giving the fellow a good seare, "Sid" let up. But you can rely on it, he won't commit the mistake of arresting a Police Commissioner again. - New York Star.

GREEK brigandage is a regularly organized business. A little capital for the purchase of arms is required. Papers are drawn up, in which the shares of the captain and the men are specified. Sometimes routes are let by one band to another for a per centage. It proving exceptionally good in one case, the parties came very near bringing the affair into Court on a law suit. Death to the eaptive is almost certain if the ransom is not paid. A ransom which was once on its way from Constantinople was stolen from the messenger by another band, but the captive was killed all the same. A farmer having two children captured could send the money only for little girl was found afterward with a stab in the heart and wild flowers in her hand. These robbers never drink wine, never neglect their religious duties, always cross themselves before eating, and never omit the numerous fast days the Greek Church insists upon. Some are well read, one leading scoundrel always traveling about with a small

library. "WHAT a rough fellow that Sniggins s!" petulantly exclaimed the Hopedale girl after a struggle with the aforesaid Sniggins at "Copenhagen." "He near-ly smothered me!" "And did you kiss the woodpile and laugh like demons him for his smother?" asked the other when a woman tries to saw a stick of miss, naively.

A College Republic. A novel experiment in college govern-

ment, which has so far been a success, was in 1870 instituted in the Illinois State University. The President and faculty calling the students together pro-posed the establishment of a republic among them. The President reminded them that they were no longer children some of them indeed were votersthat they ought to begin learning the art of self-government, and make themselves familiar with the duties and practices of government. After some days of retlection, they decided on its adoption. By the President's help a constitution

and by-laws were adopted. The general assembly of the students made the laws subject to the unqualified veto of the President. Laws against gambling, drinking and disturbing the quiet and good order of the buildings were passed, and fines imposed. The issue having been made, the Attorney-General decided that it was a lawful corporation.

Its operation for more than ten years has determined its success. Offenders dread its authority more than they do that of the faculty. The increase in the number of students rendered necessary the election of a Senate of twenty-one members to whom the law-making power was transferred, and 'misdemeanors are tried in due form. The President says t is so popular among the students that when a member of the State Legislature disparaged it in their presence, they nissed him. They have become well trained in parliamentary rules and the sages of deliberative assemblies. Several times, however, the whole scheme would have broken down but for the moral support and encouragement of the

Wherever such plans have been tried, ven among younger boys, they would eem to have succeeded. Perhaps this because the failures are not reported. They are generally proposed and carried through by men of original minds, and unusual tact in their dealings with the young. It apparently requires exceptional ability in the instructors or heads of the institution to inaugurate the plan and care for it in its infancy. This oflers a hint certainly to the other colleges, and if a republican form of government has its advantages over others its general adoption should be the next step in eduit, but it would be wise to discover these, and introduce it into all schools as far as t proves practical. If it do no more than modify the iron and imperial discipline in some schools, it will have gained a

victory. - Detrait Free Press.

The Antomatic Undershirt. There is one man-Prof. Johnson, of Chicago-who has come to the relief of perishing humanity with what promises to be the most valuable invention of the age. This is "Johnson's Automatic Undershirt," a garment which, so to speak, changes itself, and automatically modifies its warmth in accordance with the thermometer. The material of which this garment is made is kept a profound secret by the inventor, but it is of such a recommendation it expands rapidly with heat and contracts with equal rapidity when exposed to cold. When the atmosspere is at the temperature of zero, (Fahrenheit) the "Antomatic Undershirt" is thick, compact, and warmer than the warmest flannel. As the temperature rises the fibers of the fubric engthen, and it becomes more and more porous, until, at the temperature of 85 legrees, it is a mere netting, which admits of a free passage of air and is cooler than any undershirt that has ever yet been devised. Thus the wearer is never tempted to change it on account of changes in the temperature. On a warm spring morning he finds that his undershrit is cool and comfortable, and if a snow storm comes up before night. he still finds himself appropriately clad. The "Automatic Undershirt" thus effectnally provides against the dangers insepurable from discarding or retaining flannel undershirts, and can hardly fail to save thousands of valuable lives.

There is precisely one objection which the caviller may make to this matchless garment, and that is that it will become uncomfortably long as the warm weather apposches. The inventor has anticipated this objection, and his "Automatic Undershirt" is made in sections, neatly laced together, so that it can be short ened to any extent at any time. To slightly shorten an undershirt is a very different thing from radically changing it, and the fact that Prof. Joinston's ingenious garment can be shortened at

will renders it ideally perfect. What is the steam engine, or the telegraph, or any other famous invention in comparison with the "Automatic Underhirt?" That inestimable garment will bring peace of mind to millions of men who cannot tell whether to change their flannels or to cling to them. It will lessen our death-rate at least one-half, and Prof. Johnston's name will be famous long after Kecley and Gamgee are forgotten. - New York Times.

Emperor of Brazil. The present Emperor of Brazil, Pedro

II., is descended from the royal line of Portugal. When the French invaded that country in 1807, the royal family fled to Brazil, which was raised to the rank of a kingdom in 1815. After difficulties with Portngal, the father of the reigning sovereign took the part of Brazil, and was proclaimed protector and perpetual defender of that country, which was declared independent in 1822, and he was proclaimed constitutional Emperor and crowned. On the death of his father, Dom Pedro I. abdieted the hrone of Brazil in favor of his infant laughter, and returned to Portugal to assume the office of King. It was during the residence of Dom Pedro I. in Brazil that Dom Pedro II., the present Emperor, was born, which event occurred December 2, 1825. He was crowned July 18, 1841, and was married Sept. 4, 1843, to Princess Christina Maria, daugter of Francis I., King of the . Two Sicilies. Their one surviving child, Princess Isabella, was born July 29, 1846, and was married in 1864 to Prince Louis of Orleans, Comte d'Eu, eldest son of the Due de Nemonrs, of the exroyal house of Bourbon-Orleans. The Empire of Brazil has greatly improved one, and the boy was returned. He begged a little delay, but the band were on the move and could not wait. The on the move and could not wait. The ments of the government put on a firmer basis. The Emperor traveled in Europe for some time during 1871 and 1872, and not long since visited the United States. where he was very cordially received.

> JOSH BILLINGS: "When I was a young man I was always in a hurry to hold the big end of the log and do all the lifting; now I am older, I seize hold of the small end and do all the grunting."

It is stated by eminent naturalists

FEELING THE EARTH MOVE.

Account of Some Curiosilies of the Wind by a Philosopher on the Roof. (New York Sun.) "Would you like to feel the motion of the earth whirling on its axis just as you

feel the motion of a buggy by the nir driven against your face? The man who asked this singular mestion looked both sane and serious. As he spoke he touched with his tinger a small globe, which, with the slight impulse thus communicated, began to revolve smoothly and swiftly within a orass ring and a broad wooden zone, on which were pictured the odd-looking figures that represent the twelve signs of the zodiac. The green painted oceans and the variously tinted continents on the little globe blended into a confused jumble of color with the motion. Europe and America, the Atlantic and the Pacitic lost their outlines. Greenland made a dark circle about the pole like

a streak on a boy's top. "You know the earth is whirling like that-many times faster than that," said the philosopher, "and if the atmosphere did not partake of the same motion there would be a constant hurricune blowing of the rate of a thousand miles on hour. Most persons accept the explanation that the atmosphere revolves as fast as the solid ground without inquiring any further, and so they lose sight of one of the most startling facts in nature. Just step up here.

The reporter followed the philosopher to the tlat roof of the house. "Don't you feel that?" asked the philosopher, putting his hand to his

"I feel a wind from the northeast," plied the reporter. "Well, that's it, then," said the phil osopher. "As the surface of the earth revolves eastward, it meets a current of air tlowing from the north, which has not yet aequired a velocity of rotation equal to that of the ground it passes over. So objects on the earth are driven by the earth's motion through air that s moving more slowly to the eastward than they are. The result is that the wind which started to blow from the poles toward the equator, instead of moving straight from porth to south appears to come from the northeast. The reason of this will be plain the minute that close to the poles the revolution of the surface is very much slower than at the equator, just as a point on the hub of a wheel moves more slowly than a point on the tire.

"You must not, however, suppose that every wind from the northeast is the result of this curious law. In fact, in this latitude it is very difficult to say when the true wind of revolution, if I may so speak of it, is felt, because there are so many local causes that govern the direction of the wind. Nevertheless, whenever a current of air starts from the far north toward the equator, this phenomenon will be experienced in all the places t passes over, although it is very often obscured by the changes of direction the wind the whirling of our globe about its axes. In the tropics this phenomenon manifests itself perfectly in the fa-mons trade winds. In fact the west and southwest winds that prevail here a large part of the year are the returning trade winds. In this ease the air, moving from the equator, where the revolution is fastest toward the poles where it is slowest, has, as it advances, a westward motion greater than that of the surface over which it passes. So marked is the prevalence of this wind that sailors call it 'down hill' from here to England on account of the easy sailing with the wind. So, you see, that, although the winds alone would never enable us to detect the fact that the earth revolves, yet now that the fact is known, we see in them one of its most striking results.

Died that He Might Live. In a dreadful cold winter, many years ago, an army was tlying from Moscow, a city in Russia. With this army there was a German Prince and some German soldiers. One by one the marching sol-

diers fell down by the way, and perished of cold and hunger. At length, at the end of one day, when only a mere handful of them were alive, the Prince and a few common soldiers, and these were nearly all spent, came up to the remains of a hovel, once built to shelter cattle, now ruined by storms, which had blown it all to pieces. But, in the wild, snowcovered waste, they did not despise it; even a Prince was glad of the little shelter from the sleet and wind of the com ing night which this tumble-down shed could afford. And there, hungry, cold and weary, he and his men lay down to sleep. The men were rough, stern-looking fellows, yet the sight of one so delicately brought up, used to comforts which they never had known, spent heart and body, come to such want, glad to sleep in such a wretched place, touched them. The sight of him asleep, no bed, no covering, probably sleeping his last sleep, was more than they could stand. They took their own cloaks off and laid them all on him gently, one by one, lest they should awake him. He would be warm with these. Then they threw themselves down to sleep.

The night passed. The Prince awoke.
'Where am I?" was his first thought, 'Am I at home in bed? I am so warm ! and he turned over, and raised himself up to look about. He was not at home. All around was snow, and all was silent save the wind which whistled through the planks and the broken shed. Where were his men? He stood up and looked, when lo! there they lay, huddled together to keep warm; yet not awake. He spoke, but they answered not. He advanced to touch them - they were dead! Without their cloaks, too! Where were their cloaks? Another glance toward where he had lain, and all was plain. The Prince burst into tears. His men were dead to save him alive, Now, was not the deed, these rough soldiers' deed, a noble deed? Their hearts were gracious hearts; they graciously took upon themselves the death another should have died .- Sunday Magazine.

Work for Reputable Citizens.

There are enough reputable citizens in every community, however, and more than enough, who, if they choose to take a little trouble about election time, could put an end to "boss" practices and purify all elections. For instance, the primaries are usually taken possession of by the lowest grade of corrupt politicians, the henchmen of the "bosses and clean handed citizens and voters and taxpayers generally give them a wide berth because of their foulness. There is no necessity thus to surrender primary or nominating coventions to the birds of prey. Combinations of citizens determined upon clean business can take possession of these bodies, as they are in duty bound to do, and compel them to be representative of the voters.

High-Price Beans.

Tom Watrons, immercial traveler, stopped off at the Marchall (Mich.) eatstopped off at the dark and (Mich.) eating-house several years ago.

He was not very hungry and ealled for a plate of beans, which he received. He inquired the property and was informed that it was 75 cents.
"That's a thundering price for beans,"

"That's the price," said the propri-SHE was sweet sixteen when she re-The train was just starting; Tom paid the bill, and to coaches bore him and his indignation on toward Detroit.

This was on Saturday. On Monday,
Gilmore, the cating-house man, received

a telegram, collect on delivery, \$1.25, which he paid, and read on opening it:

"A thandering price for beans."

Thirty days from that date a neat express package, is handed in to Gilmore, C. O. D., who paid 90 cents for the privilege of opening it to discover a lot of sewdust, on the top of which lay a slip of paper with the cabalistic symbols: "A thundering price for beings!" Two months from this Gilmore was summoned to Chicago to meet a former

business partner, and the hotel clerk handed him a letter conveying the ideasant information : "A thundering price for beans!" During Gilmore's absence his son paid for two telegrams and one express pack-

age, all bearing directly on the subject ot 75 cents being "a thundering price for heans!" Cost of these articles, \$3.80. mining-share broker advising him to get it out. - Yale College News. sell was refused, and the loss of it entailed an actual damage to Gilmore of Mrs. S., in a reproving way, "that that

A year rolled away. Gilmore ordered a case of Mackinae trout from Detroit, ejecting a fleecy cloud; "yes, I know it They came C. O. D., \$13.83; when and I'm trying to smoke the rasea opened he found every fish had been re- out moved from the ice and sawdust, and a shingle met his eyes, marked with a blue lead-pencil: "A thundering price for beans l" Trouble arose between Gilmore and the Detroit fish house, and they went to law, Gilmore winning the suit, \$25 damages, and all at a cost for attorney's services of \$86.90. Gilmore grew dejected. Life looked

gloony. Letters ponred in on every one of his family at regular intervals from all parts of the world, bearing the unpleasant information that it was "a hundering price for beans ! At last Gilmore sold the Marshall eating house and moved to Chicago. carried his deep affliction along with him, gnawing like e cancer at his vitals. The

ersecution nover ceased. Gilmore brooped, faded, and tinally died. The terribly afflicted family followed him to his last resting place, and the widow, with what little money she had saved from the expenses of bogus telegrams and express packages, erected a plain marble slab to the memory of the tor-The following Sabbath the mourning

tured Gilmore. family went out to the cemetery to plant some violets on Gilmore's grave. Arriving on the ground, they observed in silent horror that another legend apeaused by ranges of mountains, great peared about the name of Gilmore, on valleys and local temperatures. But the curious fact remains that we can feel in small-blackboard and read: small-blackboar and read:

A THUNDERING PRICE FOR BEANS. -Central City Item.

How the Kronmirs Live.

Recent events have given an interest n these people, who dwell in an almost mknown country. The dwellings of the Kronmir chiefs are somewhat superior to the other inhabitants, but even the chiefs share their homes with the nules, the cows and the goats. The dwelling consists of but one room, divided into two unequal compartments by a roughly made partition about a metre high. On one side of this wall the family live; on the other the cattle. At the enlrance to caeh village or group of mud huts there is a sort of public building called the 'Djemaa," or meeting place, and it is here that the people assemble at intervals to discuss matters of general interest, the men wearing a loosely fitting woolen or cotton shirt, and over it one or two burnons, according to the season.
Their head-gear is a kind of skull-cap,
knitted or of red felt. The arms, legs and the neek are left bare, but the feet are protected by a piece of leather at tached to the foot by a number of inter-twining strings. The dress of the young women is described as extremely grace ful. A large piece of woolen stnff, folded in two, is attached to the shoulder with a metal brooch, and reaches just below the knees. A bright-hued girdle eneircles the waist, and their toilette is completed by a gandy handkerelief wound round the head. With regard to morals the laws are strict. No man is allowed to have more than one wife, or to live with a women unless the union has been sanctioned by marriage eeremonies. Women, however, are bought and sold like cattle, and a widow can be appropriated by a male relative of her deceased husband without any payment being exacted for her. The usual diet of the tribe consists of "kous-kousson," a national dish, milk in abundance, and fruit; the aged alone cit wheat or meat. The Kroumirs entertsin seant respect for the anthority of the Bey, but regard with reverence Abdellah-ben-Djemal, their patron; it is this marabout or priest who, they believe, protects their territory, and to whom they look for guidance .-Revue de Geographie.

A Plucky Bride. Once npon a time a spinster lady

lived in Airth who could count as many golden guinoas as ever "Tibby Fowler" did. Beside this spinster lived a bachelor of somewhat parsimonious habits, and passionately fond of the "yellow Geordies." The two made it up and agreed to get married. Before the wedding, however, the man opened his month too wide, and boasted what he would de after he got possession of his wife's tocher. A good-natured friend -there are always plenty about-conveyed this information to the bride, who opened her eyes and at once made up her mind how to proceed. When the minister came to perform the ceremony, and at the usual stage requested the couple to join hands, what was the as-tonishment of both clergyman and company to see the bride offer her pocket instead of her hand. Thinking there might be some mistake, they were again requested to join hands, but this, as well as a third request, met with the same pantomimic reply. The reverend gentleman was at last under the necessity of asking for an explanation, to which the bride at once replied : "It's not me he wants, it's the pouch. He can marry it if he likes, but he'll

never marry me. Then she slowly curtseyed and left her astonished bridegroom in a state of

strange customers,"

A Norwegian Village. Vossevangen is a little farming hamlet on the west shore of a beautiful lake. The region is one of the best agricultural districts in Western Norway; the "Voss" farmers are held to be fortunate and well-to-do, and their butter and cheese always bring high prices in mar-

As we drove into the village we met the peasants going home from church; the women in short green or black owns, with gay jackets and white handerchiefs made into a tlying buttress sort of head-dress on their head; the men with knee-breeches, short vests and jackets, thick trimmed with silver buttens. Every man bowed, and every woman courtesied as we passed. To pass any human being on the highway without a sign or token of greeting would be considered in Norway the height of ill-manners; any child seen to do it would be sharply reproved. Probably few things would astonish the rural Norwegians more than to be told that among the highly civilized it is considered a mark of good breeding, if you chance to meet a fellow-man on the highway, to go by him with no more recognition of his presence than you would

give to a tree or stone wall. Il is an odd thing that a man should be keeping the Vossevangen Hotel today who served in America's eivil war, was for two years in one of the New York regiments, and saw a good deal of active service. He was called back to Norway by the death of his father, which made it necessary for him to take charge of the family estate in Vossevangen. He has married a Vossevangen woman, and is likely to end his days there, but he hankers for Chicago, and always will. He keeps a fairly good little hotel on the shores of the lake. In one corner of the dining-room was a large round table eovered with old silver for sale; tankards, chains, belts, buttons, coins, rings, buckles, brooches, ornaments of all kinds—hundreds of dollars' worth of things. There they lay, day and night, open to all who came; and they had done this, the landlady said, for years, and not a single article had over been stolen; from which it is plain that not only is the Norwegian honest himself, there must be a contagion in his honesty which spread it to all travelers in his country.—Atlantic.

The Laplander. The Laplander's sledge has no run-

ners, but, like himself, it is covered with reindeer skin, and is in shape some-thing like a canoe. Harnessed to this sledge, the reindeer starts off with almost the rapidity of the steam engine, going fifteen or twenty miles an honr. The reindeer is not only the Lap lander's horse, but his cow, and, during the time that it gives milk, he is freezing large quantities of it, to be used when no more is obtained. Then he breaks off a piece, warms it ont, and has again a good article of milk. The deer is also his food, large herds of them being kept in some parts of the country. From its skin the Laplander makes the roof and floor of his house, his bed, his shoes, and stockings, his clothes, and cords and strings for his bow. Without this animal, the Laplander would be in a deplorable condi-

GRANDMA'S STRATEGY.

- l'onth's Companion.

It was one of those warm, bright spring days when little children are frisky us young lambs, and those of larger growth feel the confinement of the selvol-room irksome. The Mountville high school was under the best of discipline, but on this particular day the moral atmosphere seemed surcharged with electricity, The scholars were restless and their reciations imperfect. The professor him self was like a buttle of new wine, ready to explode at the slightest disturbance. The rhetoric class, composed of half-adozen young girls, was usually tractable enough; but to-day their minds were wandering off in the fields among the violets and spring beauties, to the neglect of their studies.

"Young ladies," said the professor, "I think I never had a rhetoric class before eapable of doing so well, that did so poorly. You ought to be ashamed of yeur standing this month." "I don't see the good of rhetoric, anyway, and it's an awfully dry, hard study," said one,

"You will remember, Miss Sophy, that your class took up this study this term by your own request, I warned you that studying Blair's Rhetorie was no child's play. But having undertaken it, I insist that you must do your best, If you are not more studious I must report you to your narents."

"Better nut report me," said Clara Williams, in a low voice, not meant to if they had not left their old homes to print it, but her airs came down contract them 'plumes' an' 'despots' an' things—to print it, but her airs came down con-"Saucy girl," said he, angrily, "you may leave the class and go home. I will see you father this evening. My patience is quite exhausted."

Clara hastily left the class and walked home as fast as she could decorously. She cutered the house and reached her own room without being seen. She was angry when she left the class, and her rapid walk had not cooled her temper, She threw herself upon the couch in a flood of tears. "He had no right to speak to me in that way," she said, "and it will be mean in him to report me to papa. Pour papa! He has trouble enough about Rob, without hearing bad reports of me; and mammu said I must be a comfort to papa (another burst of tears). Oh, what shall I do? I wish I hadn't tlared up so-I'm always doing it; and papa will be so angry! If I had only thought a moment! Oh, dear, I wish mamma had lived (more tears). What shall I do? l'oor papa! I wish I hadn't spoken. Oh, denr-that hateful professor-what shall I do?" and plenty more of the same kind, which at last enlminated in this: "I'll go and tell grandma." So down to the dear grandma's room she went, and told her all about it. "l'oor child," said the old lady,

"maybe he won't come, after all," "But he will, grandma," said Clara, 'He isn't a man to say one thing and do another; and papa is in such trouble about Rob. Oh, I'm so sorry I spake." "Poor, dear Rob," said grandmit. "I don't believe a word about his doing wrong; it isn't like him; the president is too hard upon him.'

"But what can I do, grandma?" "Dear child, maybe you had better see the professor, and tell him you are

"But I shan't have a chauce. Oh, there he comes up the walk this minute, and Ann will show him right into the library where papa is—oh, dear!" Well, dear, I'll see what I can do.

Perhaps I can manage so you can see him. I think he is a gentleman, and will be considerate. Is Mike at work in the garden, dear?" and grandma hurried ont into the yard where Clara saw her the next moment in consultation with the

Meanwhile Professor Maey was not in the most placid frame of mind. Esquire Williams was the rich man of the place, of high social position, and chuirman of the board of education. It was not an agreeable task, certainly, that he had imposed man of his only daughter's doings. The professor almost repented his hasty words; but they had gone forth, and who should disanual them? So he climbed the stone steps of the Williams' mansion and rang the bell, conscions of sensations similar to those he had experan aching tooth.

'Squire Williams received him cordially, and very naturally inquired after the welfare of the school. The professor replied to his questions to the effect that all things were moving on smoothly. "But," said he, "I have come to vin sir, npona very impleasant errand." Just at this point Fred, the small boy of the family, rushed in like a hurricane, exclaiming, "Papa, grandma, wants you ont in the garden this minute; it's very important.

"Excuse me a moment, prefessor," said the 'Squire, "while I set this boy an example of filial obedience." As he left the room by one door Clara entered by another, and with a fnee all bathed with blushes and tears, ex-

claimed: "Oh, Professor Macy, I am so sorry I spoke as I did this afternoon, and I will try never to do so again; but I wish you wouldn't tell papa. I will promise anyyou ask, and I will apologize be- but are daily following fashions equally fore the class to-morrow if you will only not tell papa. He is having trouble about brother Rob. The President has been writing to him, and we are afraid Rob will be expelled if he doesn't do better; and mamma said I must be a comfort to poor papa,"

Here a fresh burst of tears interrupted her, and before the astonished Professor

Esquire Willisms had found the errand ticipated from the urgency of the mes-

say: 160h, nothing very important-I am sorry to trouble you, but-(Clara in the next room behind the drapery said: 'It will be so mean if he tells now,') but -we really need a new globe and more

eliemical apparatus. And I think, sir, the health of the school would be promoted by a better method of ventilation. The 'Squire said he would lay these matters before the board at the next meeting, but doubted if they would consent to so great un outlay at one timo. The Professor also had doubts, but did not sny so.

Somewhat to Clara's dismay the Professor staid to tea by her father's invita-At the table, as she sat demurely behind the tray and ponred the tea, ber small brother, in a lond whisper (meant to be very contidential) said: "Grandto be very contidential), said: ma, what makes sister's eyes so awful

The next day as soon as the rhetoric class had taken their places, Clara Williams arose and made a very humble apology for her conduct the day before, and begged her teacher's pardon, which no doubt was granted. — The Interior.

The Texas Climate.

The funny man of the Texas press writes: The climate of Texas is an unabridged one, and we would be doing it an injustice if we did not devote some space to it in this paper.

When the pions old Spanish mission-aries first came to Western Texas to convert the Indians, and everything else they could lay their hands on, to their own use, they noticed theextreme balminess of the atmosphere, the gorgeous Italian sunsets, and the sperior quality of the climate. They were surprised that the Creutor would waste so much good climate on the wicked heathen. Back where they came from, where all the folks were good Catholics and abserved 211 holy days in the year, they couldn't raise as much climate per annnm as they could harvest in Western Texas in one short week.

In the early days of the Republic of Texas, and even after amexation, many of the white men who came to Western Texas from all parts of the United States had strong sanitary reasons for preferring a change of climate. To be tore explicit the most of the invalids had been threatened with throat discuse. So sudden and dangerous is this disease that the slightest delay in moving to a new and milder climate is apt to be futal, the subject dying of dislocation of the spinal vertebra at the end of a few minutes and a rope. A great many men, as soon as they heard of Western Texas, left their homes in Arkansas, Indiana and other States - left immediately, between two days, the necessity of their depurture being so urgent that they were obliged to borrow the horse they rode to Texas oa. All these invalids recovered on reaching Austin. In fact they began to feel better, and considered themselves out of danger as soon as they crossed the Brazos River. Some of those who would

not have lived twenty-four hours longer soon as it was discovered that the climate ers. of Western Tevas was favorably disposed towards invalids, a large number of that class of unfortunates came to Austin. Many well authenticated cases of recovery are recorded. Men have been known to come to Austin far gone in consumption, and so far recover as to be able to run for office within a year, and to be defeated by a large and re-

candidate. There is very little winter in Western would have almost a tropical climate, as it is situated on the same parallel of latitude of Cairo, in Laype, where they

have tropics all the year around. As it the early morning. Occasionally New ments of green and the fruit trees come ont in bloom. Prairie flowers and freekles come out in this month, and the rnral editor begins to tile away spring poetry. In February stove pipes are laid away in the woodshed and the syrup of squills and kough kure man puts n coat of illuminated texts on the garden fences. Seedticks are not pulled until April, but after the middle of March there is no danger of the musquito crop being frozen. Early in March the doctors oil their stomach-pumps, for the and has to be removed from the school

The Style.

Though it would seem that the people of all countries are equally vehement in the pursuit of this phantom, style, yet in almost all of them there is a strange diversity in opinion as to what constitutes its essence; and every different class, like the pagan nation, adores it nuder a different form. In England an honest citizen packs up himself, his family, and his style in a buggy or timwhisky, and rattle away to spend Smis day. A baronet requires a chariot and pair; a lord must needs have a baronche upon himself—the complaining to such a and four; but a dake, O' a dake, cannot possibly lumber his style along under a coach and six, and hulf a score of footmen. This style has ruined the peace and harmony of many a household, for no sooner do they set up for style, than all the honest old comfortable sans ceremonie furniture is discarded, and you ienced when going to the dentist's with stalk cautionsly about, amongst the uncomfortable splendor of Grecian chairs, Egyptian tables and Etruscan vases. The vast improvement in farniture demands an increase in the domestic establishment, and a family that once required two or three servants for convenes, now employs half a doven for style. Bell Brazen was one of these patterns of style; and whatever freak she was seized with, however preposterous, was implicitly followed by all who would be eonsidered as admitted in the stylish arcana. She was once seized with a whim-wham that tickled the whole court. She could not lay down to take an afternoon's loll but she must have one scrvant to scratch her head, two to tickle her feet, und a fourth to fan her delectable person while she slumbered. The thing took--it became the rage, and not a sable belle in all Hayti but what insisted upon being fanned and scratched and tickled in the true imperial style. Sucer not at this picture, my most ex-

absord.—Irring.

Nose and Face. A somewhat singular fact has been observed with reference to the shape of the nose, or rather, the setting of it in the face, so to speak. To be strictly correct, from the artist's point of view, the nose should be accurately in the midcould find words to reply, her father's step was heard in the hall, and Clara the nose should be accurately in the hid dle of the face, and at right angles with a line from the pupil of one eye to that of the other. As a matter of fact, it is rarely or never found thus placed; it is to the garden less important than he an- almost invariably a little out of "the square," and the fact of its being so is sage. His mother had sent for him to often that which lends a pecular expresask his advice about some trifling matsion and piquancy to the face. A mcdters—only the transplanting of some curical writer points out that there are anrant bushes that Mike was engaged in. atomical reasons why a slight deviation As he returned to the library he began from the true central line may be exto fear what he never observed before, pected, and that the nose which is thus that his dear old mother's mind was accurately straight between the two eyes failing. He said to the Professor: "You may, after all, be considered an abnormal were about to tell me something about one; the only absolutely true and cortect organ being, in fact, that which thus The Professor flushed, but managed to deviates a little to the right or left.

nature of the ceremony. It was the

funeral service of a late admiral in the

Freuch navy. Out of doors were more

than two thousand soldiers, ahorse and

on foot, who had attended his remains

Paix to the Madeleine. The church it-

self was packed with persons most ef

them distinguished in polities, literature.

science and art. Grand commanders and

chevaliers of the Legion of Honor, field

officers and sons officers from the army;

foreign ambassadors in their gold-fringed

garments, and members of the Institute

wearing their famous livery of green;

parsons in priestly robes and sad faced

mins in their ngly frocks and hideous

"What public building is yonder?"

leine. There is something exceedingly

imposing in its external aspect. Without

dome, towering or side windows, it

stands on un elevated base, majestically

supported on every side by a lofty range

of massive Corinthian columns. Inside

splendid paintings, many marble altars

The sad service progressed but I was

too busy noting the spectators to pay at-

tention to the ritual. Suddenly, how-

ever, in a panse in the service the im-

appeared fairly to tremble and the deep

bass notes seemed like the reverberations

of half suppressed thunder. They yielded

to the thite-like cadences of a lovely

duetto. Then from an invisible source

there stole on the earth plaintive silverly

notes of one of the sweetest soles to

which I even listened. It seemed like

behalf of the dead admiral and for the

sins of all of us living ones. Now it

grew fainter and fainter, and presently,

as soothingly as the last tones of a harp,

it was gently linshed. It was the voice

of M'lle Isaaes, prima donna at the opera

comique and mistress of one of the

Rothschilds; but, oh, it seemed like

that of an ungel. The services were

short and the remains were linried

nway into the country. The black cloth

blossoms and white satin and fragrant

bright and glorious, where, only a few

minutes before, gloom and great distress

prevailed among a multitude of mourners.

A Scared Ex-Confederate.

"I think, Vest," said Senator Buther

the other day, "that the story you tell about that fellow in Richmond who went

to have his picture taken is about the

ator from Missouri, "we had a man by

elected to the Confederate Congress from

the Springfield (Mo.) district, and he

came down to the seat of Government

with the nir of a Webster about him, and

just looked and talked for all the world

as if the entire responsibility of the cause rested on his individual shoulders. 1

knew him at home, and hence was

spared the anxiety of being disturbed

about his greatness. It was not long

before the close of the war when Garland

and I were walking down Graec street,

and l'eter ran into us. He had a benign

smile on his face, and I knew he had

been engaged in some agreeable sport.

Coming up to us, he said: 'Vest, I've

been down street here to a photogra-

pl.ci's. Got a card from him theother day

asking me to call and sit for a picture.

He wants to get up the whole Confeder-

ate Congress-something historic, ch?

GRANDMA CHERRITREE'S COURT

... Atlanta Constitution

SHIP. "Deary me," said Grandma Cherriree as she beamed, empty saucer in one and and spoon in the other, upon the merry, young girls gathered around her ice-cream freezer, at the Fourth of July 1881 pienie in Cedar Grove, "this ero pienie, with all them lireworks, an' flags, an' drnms, an' baskits of victuals kinder sorter puts me in mind of the Independence Day, when I met my Archinpus for the first time, 'Chippy' called him arter we was married an 'old Chips' his schooluntes an' intermate friends called him both before nn urter. 'There wurn't no highfalutius airs about him. He b'lieved like the Quaker, that no man's any better for havin' a handle to his name. Well, well he was a tine-lookin' chap when he came a-courtng me. Tell you all about it! Goodness graeions 'gals, what good would that do you? Twarn't nothin' very interestin' to me at the time. There wurn't no rnnaway horses, or ter ble tires, or ships a-sinkin', or dreadful villains in it like there allus is in printed love-steries. (Thank you, Gertie, my dear; I will take a leetle more ice-cream. It's so coolin' to the innords in hot weather.) An' i vou insist upon it gals, I'll tell you all there is to tell, though's I said afore taint much, but I 'spose it's as nateral for young folks to want to heur 'bont conrtin' as 'tis for a tadpole to bust inter a frog. You see, Archippus-great grief wasn't Mahala Korn mad when he follered me 'round that day an' never took no notice of her, though she had a fenther in her lint half a mile long that she'd borrowed from Sallie Larks, the nilliner-she an' Sallie was old cronics nn' pooty much alike, which nin't savin' much for either on 'em. But 'twas on a Fourth of July 1 met him at a guthbrin' n Gazard Smith's wood. John Henry Hylad-he kep' the grocer store -spoke a piece. Said he made it out of his own head, but he didn't no more than I did. His head looked just like a cocoanut, an' i curpty coconnit I allus thought; not a drop of milk in it, an' no sich lookin head as that could git off all them things bont our galorious Republic, an' makin' the crowned despots trimble on their thrones, au' soarin' like the prond bird of freedom to the settin' sun, whose

plumes become a weepin' in ev'ry free "Miss John Henry Hylad was so proud of it that she got John Henry's brother—he was a printer an' sich a him' -most of them printers nir, an' I allns kinder thought he was responsible fur as, and, by earefully avoiding the causes siderable when the prize was gin to me that led to their former troubles, were | nt the State Fair for the best pan of pork never again in any danger of the bron- on' beans, an' her pound cake turned chial affection already referred to. As ant's sad's a fun'ral without any mourn-

"Yes, ves, don't be onpatient. I'm comin' to Archippus in a minnit. He warn't long cumin' to me that day, an' the fast thing he said was sho! what's the good of tellin' that, though? Them things sound very pooty when they're savin', but there's no denyin' they sound kinder silly arterwards.

"You see, Almira Healthy she cum in spectable majority all owing to the atmos- for me to go along with her to the gathphere and the popularity of the other erin'. (A leetle more since you're so pressin'. Sum of the red kind. I allus was a powerful hand for ice-cream.) Texas. But for the northers Austin | She was a good soul, was Almiry, though she did do some awful funny things, Sum folks said she was a little queer in in her load, but I allus found her all right, 'cept a mite forgitful now up is, there is seldom any frost, although it then. Wimst I remember she made a is not an unusual thing for lumps of ice | batch of pies. There was to be a Methseveral inches thick to be found-in only camp-meetin' in Jared Brown's tumblers by those who go to market in grounds an' the minsters was to eat round 'mong the village folks, an' she Year's calls are made in white linen suits | made them pies-fruit pies they wasand an intoxicated condition. Spring as nice as could be-n paste wreath on begins seriously in February. The one an'a bird on another, an' a cross on forest trees put on their beautiful gar- another, an' a tombstun, natral as life, on another, an' so on, an' she popped 'em juter the oven an' set down in her rocker with her knittin' a-singing, 'Come ye sinners, poor an' meedy Finely she gave a sniff or two an' won dered why on nirth she didn't smell them pies a-bakin'; an' she got up an' opened the oven door, an' there they was as white an' that as when she put 'em in -'eause-'eause-I allus have to laugh when I think of it (just a spoonful or two-vanilla this time)-she'd never made no tire in the stove! An' when I green mulberry ripens about that time | told Chippy 'bout it-'twas arter he'e asked me to be his n-he said-but sho what's the good of tellin' that? It sounded side-splittin' funny when he said it, but I doubt it'd 'pear awful shaller now. An' nuother time Almiry was a settin' under the old apple that grew by the kitchen door - ter'ble hot day it was—when a man eum 'round from the front yard with a door-mat over his shoulders. 'Please, ma'am,' sez he, makin' a bow very perlite an' screwin' up his face as though he'd pain in his strimmick, 'I wish you'd buy this door-mat if only for charity's sake, sez lie. 'It's all I've got left out of six,'

sez be, 'which I've carried 'round this scorehin' day, an' the prophets on all six is scareely enough to buy bread for my starvin' family, 'sez he'. ' How much is it?' asked Almiryshe had a real soft heart-thinking she'd take it for the back door, as it jest matched the one on the front porch. 'Six shillin's,' sez he, 'an' that's a quarter less than I got for t'other five.' Almiry counted out the money-she'd got it for eggs that mornin'-an' giv' him half a dime over an' above, an' asked him to stop a miunit an' have sum crullers an' a glass of milk. 'Thank you a thousand times, dear lady,' sez he, 'lmt I couldn't, knowin' that my dear ones was suffrin'. I must haste to them,' says he, an' he harried away. An' Al-

miry goin' with tears in her eyes-she was so affected by his love for his dear ones-to see if he'd shut the front gate arter him found out-good gracious! I allus choke when I think of it (lemon, my dear. . It's very refreshin')-that she'd bought her own mat. The seamp stole it off the front porch an' walked round and sold it to her for the benefit of his starvin' family. "Now don't you go to gittin' onpatient, gals, 'eause I'm going to tell you bout the courtship right off. You see he was a handsum feller an' no mistake,

an' all the gals, an' widders too, was arter him, an' leetle did I think he'd be arter cellent townswomen, for who among you me. But that very Fourth of July I was ital. a settin' off firecrackers for my youngest brother, an' Archippy cums up to me as bold as a lion au' sez he; 'Miss Sweet why is your name—' But sho! 'twas awful nonsense. Don't sound silly when I think of it, but 'twould if I spoke it out, an' I guess, on the hull, I won't narrate any more, for young men, I reekon, mostly say the same things when they fall in love, an' you'll find out what them are before long.

"Only one spoonful, Matilda, I begin to feel kinder frozen inside. - Margaret

Twenty-six distinct companies have been started since December, 1879, to work the gold mines in South India, with a subscribed capital of \$15,000,000, half of which has been paid for the

thred. He was a chestmit, and took a couple of thoroughbred colts with him, mines. "In what condition was the patriarch Job at the end of his life?" asked a Sunday-school teacher of a quiet-looking boy at the foot of the class. "Dead," to be very old are occasionally seen far calmly replied the boy.

A rndeness is worse than a crime: it is a blunder, because it is so easy to be

The last injury which a man forgives is a wrong to his amour propre. "Letters which are warmly scaled, says Jean Paul Richter, "are often coldly opened." When writing remember the haracter of the person you are addressing, and don't waste your sweetness mon desert air. Don't "cut" anybody; that is, take

eare not to know anyhody whom you will be obliged to 'ent." Always present the person of lower rank to the person of higher, a gentleman to a lad; the young to the old. Never make introductions unless yor have good reason to believe that both parties are agreeable. Never seal a letter of introduction. The hearer ought to know on what terms

to approach a stranger. No husiness is well done that is done through any other ngency than your If you pass an acquaintance with lady on his arm, do not nod; take off your hat, so that your salute may seem to embrace both your friend and the

white bonnets; professional gentleman in evening dress, and working men in An adherence to etiquette is a mark of their blue blonses-all present-who espect; if a man be worth knowing, he came out of curiosity to assist at the sad surely worth the trouble of approachrites. I had never before taken notes of ing properly. It will likewise relieve this very singular editice. King Louis you from the awkwardness of being ac-XV started to build this structure. the name of Peter Wilkes, who was Husbands and Wives. A good husband makes a good wife, ome men can neither do without wives nor with them; they are wretched alone what is called single bles edness, and they make their homes miserable when they get married; they are like Tompkins' dog, which could not bear to be loose, and howled when it was tied up. Hoppy bachelors are likely to be happy husbands, and a happy husband is the happiest of men. A well-matched couple carry a joyful life between them, as the two spies carried the cluster of Esheol. They are a brace of birds of Paradise. They multiply their joys by sharing them, and lessen their troubles by dividing them. This is tine arithmetic. The wagon of care rolls lightly along as they pull together; and when it drags a little lieavily. or there is a hitch anywhere, they love each other all the more, and so lighten the labor. - John Ploughman.

Everybody Hight. When everybedy says a "thing is so, t must lo so." On this point Mr. A. H. Lyman, Drnggist, Manistee, Mich., writes: Every one who tries St. Jacobs 1 Oil says that it is the best remedy ever used for rhenmatism. Mr. White, a customer, after having employed every known specific for rhenmatism was cured by St. Jacobs Oil, -Indianapolis Indiana Farmer.

Did not Understand Journalism. I recollect sitting at a table in London beside the editor of a leading journal; He said: "I am in distress; I have lost one of my regular writers." I did not know about journalism at the time, so I remarked: "I suppose you will have to get another." He replied: "Get nnother! I will have to get three, and I will be surprised if at the end of a year one of these three writers does as well as the writer I have lost."—Goldwin Smith.

Barnard Manufacturing Company. Mr. Isaac I. Hart, Superintendent, No. 3 Ashton street, says: I have used that superior remedy, St. Jacobs Oil, in a severe case of rheumatism in my arm, and its effect was wonderful, having banished, after a thorough trial, all pain leaving my nrm as well as ever .- Full River (Mass.) Daily Herald.

FENDERSON was at the theater the other night. "It was a burlesque, a take-off, wasn't it?" asked Smith.
"Yes," said Fenderson, "that's what it was, I gness. They had taken off about Transcript.

Obesing the People.

The popular position of candidates for office these latter days, upon disputed Masculine Essentities and Feminine questions, is to pledge themselves to obey Orrice—Helnze Building, Clinton Street. They have an aufaltering confidence in Ringing Report of a Rousing Wolike voice of the people, and will waive Hights Meeting in llie voice of the people, and will waive their own judgment if the people will give them office. This is good, to be sure, Editor of the Courter:

thinks the voice of the people when right sealed and addressed to me: Tox Correct won the Democratic nomination for the Legislature in McCracken county.

If the voice of God; but when it rough, it is the voice of the devil.
